improving for many types of cancer, thanks to improvement in cancer screening treatment and prevention. There are over one hundred different types of cancer and each is classified by the type of cell that it initially affected.

The most common cancers are those of the lung, Oesophagus, prostate, breast and cervix. Breast cancer alone accounts for more than twenty one percent of all cancer affecting women. Those in the rural areas are most affected. Since they do not go for screening due to lack of information and facilities. This is the group that is seriously affected since they go to hospital when cancer effects are at advanced stages. This delay poses difficulties and challenges in the treatment and management of the disease.

Although medics have been able to handle infectious disease and reduce maternal mortality. Cancer remains a big challenge to them.

The exact cause of cancer is unknown. However, the disease has been linked to many factors like genetic factors, lifestyle factors such as tobacco use, diet and physical activity; certain types of infections and environment exposure to different types of chemicals and radiations. Lack of (physical) activity leads to sedentary kind of life. This may lead to continuous production of abnormal cells which are cancerous.

Instead of walking to work or even cycling we drive a lot. This results to being over weight and obsess, in all aspects it is associated with different types of cancer.

Obesity also causes diabetes and heat problems. There is an increase in non-communicable disease. Currently, the number of doctors the county has is too small compared to cancer (patients).

As a matter of fact, there are only five cancer specialists in the country. The cost of treatment is high. A session of chemotherapy can cost ksh.30,000 although their ability to treat cancer has not been confirmed scientifically. Signs and symptoms of cancer varies depending on the part of the body affected. Some general signs are associated with but not specific including fatigue, areas of thickening that can be felt under the skin, weight changes, skins change such as yellowing, darkening or redness of skin, sores that don't heal; persistent cough, hoarseness, difficulty in swallowing, unexplained bleeding and so much more.

- a.) What causes cancer according to the passage? (1mk)
- b.) List three things that have led to improvement in cancer survival. (3mks)
- c.) Why are people in the rural areas most affected by cancer? (1mk)
- d.) The word "maternal mortality" as used in the passage refer o (1mk)
- e.) How has the change in lifestyle increased cancer cases? (1mk)
- f.) Sedentary lifestyle can also be referred to (1mk)
- g.) A specialist who deals with cancer disease is called \_\_\_\_\_ (1mk)
- h.) The best title for the passage could be (1mk)
