## 5. Integration

1. The diagram below, not drawn to scale shows part of the curve $y=x^{2}+5$ and the line $y=$ $8-2 x$. The line intersects the curve at points C and D . Lines AC and BD are parallel to the $y$-axis.
the $y$-axis

a) Determine the coordinates of C and D
b) Use integration to calculate the area bounded by the curve and the x - axis between the points C and D (3 mks)
c) Calculate the area enclosed by the lines CD, CA, BD and the x -axis ( 2 mks )
d) Hence determine the area of the shaded region
2. Evaluate:- $\quad \int_{2}^{5} \frac{x^{2}-3 x+2}{x-2} \mathrm{~d} x$
3. Find the values of a which satisfy the integral

$$
\int_{0}^{f}\left(x^{2}+1\right) d x=2 a
$$
