iii) $\Delta H=\Delta H_{1}+\Delta H_{2}+\Delta H_{3}+\Delta H_{4}$
iv) Exothermic.
16. I-a-Latent heat of fusion is the heat change that occurs when one mole of a solid substance changes into liquid at constant temperature.

- Latent heat of vapourization is the heat change that occurs when one mole of liquid
substance changes into gas at constant temperature.
$b-B C$ - The liquid loses heat as it cools hence decrease in kinetic energy of the particles
- CD - The liquid changes to solid as temperature remains constant at freezing point.
II. (i) Scale - *TZM*

Plot-*TZM*
